-2-

5. If the Soviets are following the plans which this enterprise had for post-World War II reconstruction, the production of the Linkaiciai plant at present could be estimated as follows:
- (a) Rifle cartridges -- 50 million per year;
 - (b) 20 mm shells -- 1 million per year;
 - (c) 105 mm shells -- 100,000 per year.
6. The water supply station [See Enclosure (A)#1] could easily be rebuilt as there were plenty of wells on the plant area. Electric power could be available from power sources in Radviliskia and Panevezys [See Enclosure (B)] if the power station [See Enclosure (A)#2] had not been fully rebuilt.
7. The departing German Army (1944) removed some of the machine tools to Riga, Latvia and some to Kaunas, Lithuania. The Soviets removed a few machine tools and installed them in Minsk. Fifteen of the better engineers were also deported to the USSR in June 1941 and 34 others in 1944.
8. The arms plant in Kaunas had a total of 350 employees. Its main purpose was to repair army vehicles and guns. It also produced rifle cartridges, but on a lesser scale than Linkaiciai.

Enclosure (A):

The buildings at "Ginklu Dirbtuves Linkaiciai" (Arms Plant Linkaiciai)

Legend for Enclosure (A):

- #1. Water supply and pumping station, completely destroyed by the Soviets on 23 Jun 41. It has been partially rebuilt by the Germans.
- #2. Electric power and natural gas installation (1400 kilowatts electric energy), completely destroyed by the Soviets on 23 Jun 41, and two-thirds rebuilt by the Germans.
- #3. Toolshop and building where 20 mm shell casings are manufactured; approximately 350' x 90'. This building was about 20% destroyed in 1941, and had not been rebuilt.
- #4. Building where rifle cartridges are manufactured; 90' x 350'.
- #5 & #6. Buildings where 105 mm artillery shells are manufactured; 100' x 380' ea.
- #7. Administrative and engineering building; approximately 6' x 200'.
- #8. Foundry - a new building - it was not completed as of 1941; approximately 100' x 380'.
- #9. Ammunition dumps (approximately 15 buildings); each 20' x 40'.
- #10. Employees' residences (three buildings).
- #11. Barracks for plant protection guards (two barracks).
- #12. Explosive departments (ten buildings).
- #13. General storage warehouse; approximately 100' x 320'.
